

FLEXYLED CH: INSTALLAZIONE A CATENARIA / CHAINED INSTALLATION / KETTENINSTALLATION

FLEXYLED CH si può installare in fila continua fino a 6000mm di lunghezza

FLEXYLED CH can be installed in a continuous line that can go up to 6000mm in length.

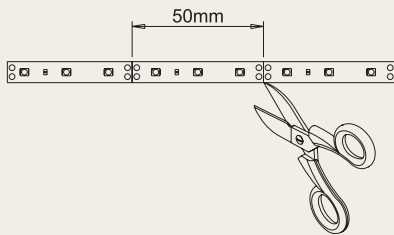

FLEXYLED CH ist für Installation in durchgehender Reihe bis zu 6000mm Länge lieferbar.

FLEXYLED CH è fornita in rolla da 5000mm di lunghezza.

FLEXYLED CH is furnished in 5000mm roll

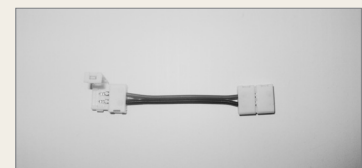

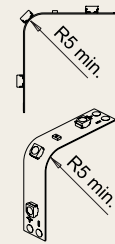

FLEXYLED CH auf 5000mm Rollen

FLEXYLED CH è facilmente divisibile ogni 50mm. Ciò permette di realizzare qualsiasi lunghezza con il minimo scarto.

FLEXYLED CH can be easily divided every 50mm. This lets you create any length with minimum waste.

FLEXYLED CH kann mühelos alle 50mm geteilt werden. Damit ist jede Länge bei geringem Abfall möglich.

Cavo interconnessione / Interconnecting cable

Cavo alimentazione / Power cord / Anschlusskabel

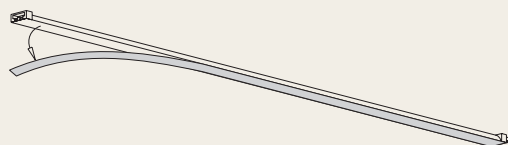

Cavo prolunga / Extension cable / Verlängerungen

Il cavo di alimentazione da 2000mm viene venduto separatamente. Corredato di connettore MiniPlug può essere collegato a prolunghe da 1000mm oppure da 2000mm che consentono di posizionare l'alimentatore anche a distanze notevoli rispetto allo strip LED.

The 2000mm power cord is sold separately complete with a mini-plug connector, which can be connected to 1000mm or 2000mm extension that allows you to place the power adapter even at considerable distances from the strip LED.

Das 2000 mm lange Anschlusskabel wird extra angeboten. Durch den vorhandenen Mini Plug-Verbinder kann es mit Verlängerungen von 1000mm oder 2000mm angeschlossen werden, dadurch ist es möglich das Netzgerät auch in einiger Entfernung vom LED-Streifen unterzubringen.

Il biadesivo ad alta tenuta garantisce una installazione rapida e senza ausilio di alcun utensile.

The highly resistant double sided adhesive provides fast installation without the use of any tools.

Das zweiseitige Haftband mit großer Haftfestigkeit garantiert eine schnelle Installation ohne irgendwelche Werkzeuge.

Sono disponibili anche dei cavi di interconnessione per il collegamento degli strip LED a distanza garantendo comunque la continuità elettrica.

Inter-connection cables are also available for the remote connection of LED strips guaranteeing the electrical continuity.

Ebenfalls lieferbar sind Verbindungskabel für den Anschluss von einem LED-Streifen zu einem weiteren LED-Streifen, damit die durchgehende Stromversorgung stets gewährleistet ist.

Grazie al micro connettore il collegamento in fila continua è privo di zone d'ombra perché la distanza tra i LED è sempre uniforme.

Thanks to the micro connector, the continuous line connection does not have shadow areas because the distance between the LEDs is always the same.

Durch die Mikro-Steckverbinder weist der Anschluss in durchgehender Reihe keine Schattenzonen auf, da der Abstand zwischen den LEDs immer gleich bleibt.
